Re: Status Change for the Moon #4, S/037/079, San Juan County, Utah

Dear Mr. Royer:

In regard to your phone call on April 13, 1994, wherein you stated that the Moon #4 mining project was going to become active and may go over the 5 acre limitation for a small mining operation in the very near future, I am enclosing the following:

Large Mining Notice of Intention Form - MR-LMO
Large Mining Operations Rules - R647-4
Reclamation Contract - MR-RC
Guidelines for completing the Reclamation Contract
Surety Bond - MR-5

May we suggest that you don't wait too long to submit the LMO if your plans are going in that direction. Processing of a Large Mine permit application typically takes a *minimum* of 6 - 9 months. A reclamation surety is required to be posted before a large mining operation becomes operative. If you would rather pursue another form of surety other than the surety bond, please let me know and I will send the correct form.

If you have any further questions, please give us a call.

Sincerely,

Joelle Burns
Minerals Secretary
